Our goals are:

To inspire and to inform young people by developing educational activities based on the realities of human powered exploration and adventure, including, but not limited to, geography, mathematics, natural science, physical fitness and social studies

To inspire and to instill the values of selflessness, sacrifice and perseverance in young people so that they might develop into good citizens, and stewards of this earth

To assist poor communities in their struggle towards selfsufficiency by providing basic educational aid and resources, know-how and facilities

All for education and inspiration...™

Around-n-Over

Gazing over a field of clouds from Windy Corner during the ascent of Denali

501(c)(3) non-Profit Charitable Organization

for Human Powered Endeavors...

...to educate,

With students of the Chalo School at Fort Nelson First Nation, BC.

Achieve and Pass on

Around-n-Over will use Six Summits Expedition: a human powered, self propelled world circumnavigation as the foundation for its educational content.

This unique human challenge will be a process of learning, of establishing milestones, and of solving problems while striving for the end goal over time.

This worthwhile story will captivate the next generation. We will interact with children from the field using available technology, becoming their eyes and ears, providing lessons on nature, people, places and cultures. We will encourage them to set goals, to nurture dreams and to persevere against all odds.

Six Summits Expedition

Erden Eruç will circumnavigate the world by human power. He will **row** across the oceans, **bicycle** on land, **sea kayak** or **walk** as necessary to approach the highest summits on each continent that he touches, and **climb** them with his friends.

Climbing the highest summits on six different continents is a tribute to his friend Göran Kropp, who died while rock climbing together. Göran was known for bicycling from Sweden to Nepal and soloing Everest.

Erden will strive to carry his personal gear without using porters, animals or supplemental oxygen.

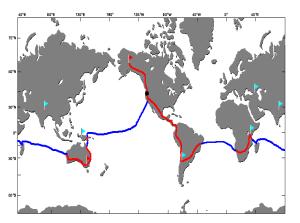

This project will be the first that Around-n-Over will support.

How to support us:

Promote – Pass on the word to engage a larger audience, children and adults alike.

Network – Help us in locating partners, sponsors, resources, and in-kind contributions from enablers for our mission.

Contribute – Consider chipping in financially and/or with know-how to Around-n-Over for its educational and physical goals.

The dream and the tribute.

Summits, continents, oceans

Erden reached the summit of Denali in North America, and Kosciuszko in Australia. He crossed Australia by bicycle, rowed the Atlantic, Pacific and Indian oceans.

The 312 days he spent on the Pacific is the new Guinness World Record. He is the first to have rowed three oceans and the most experienced ocean rower with 629 career days at sea.

Progress: not just rowing

Around-n-Over raised about \$70k to benefit İLKYAR Foundation and contributed \$5k in matching grants to build a girls' dormitory in rural Turkey.

We also raise funds to support the effort to build additional classrooms at the Mateves Secondary School near Arusha in Tanzania.
